Notes to Financial Statements

For the three-month periods ended September 30, 2014 and 2013

---

(expressed in Canadian dollars)

## 1 General information

Société d'Exploration Minière Vior Inc., (the "Company"), governed by the *Quebec Business Corporations Act*, is in the business of acquiring and exploring mining properties. It has not yet determined whether its properties contain ore reserves that are economically recoverable. The recoverability of the amounts shown for mining properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the exploration and development of its properties, and upon future profitable production or proceeds from the disposal of properties.

In addition to ongoing working capital requirements, the Company must secure sufficient funding for meeting its existing commitments for exploration and development programs and general and administration costs.

Management is periodically seeking additional forms of financing through the issuance of new equity instruments, the exercise of warrants, common shares and stock options to continue its operations, and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future. Without new funding being available, the Company may be unable to continue its operations, and amounts realized for assets may be less than amounts reflected in these financial statements.

The address of the Company's registered office is 116 St-Pierre, Suite 200, Quebec City, Quebec, Canada.

## 2 Basis of preparation

These condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of condensed interim financial statements, including IAS 34, *Interim Financial Reporting* and using the same accounting policies and methods of computation as our most recent annual financial statements except for the change in accounting policies describe in note 3. The condensed interim financial statements should be read in conjunction with the annual financial statements for the year ended June 30, 2014, which have been prepared in accordance with IFRS as issued by the IASB.

These financial statements were approved by the Board of Directors on November 26, 2014.

## 3 Changes in accounting policies

### *Adopted in 2015*

The following new standard is effective for the first time for interim periods beginning on or after July 1, 2014 and has been applied in preparing these condensed interim financial statements.

### IFRIC 21, *Levies* ("IFRIC 21")

In May 2013, the IASB issued *International Financial Interpretations Committee* (IFRIC 21), *Levies*. IFRIC 21 is effective for annual periods beginning on or after January 1, 2014 and is to be applied retrospectively. IFRIC 21 provides guidance on accounting for levies in accordance with IAS 37, *Provisions, Contingent Liabilities and Contingent Assets*. The interpretation defines a levy as an outflow from an entity imposed by a government in accordance with legislation and confirms that an entity recognizes a liability for a levy only when the triggering event specified in the legislation occurs.

The adoption of this standard did not have an impact on the Company's condensed interim financial statements.

# Société d'Exploration Minière Vior Inc.

## Notes to Financial Statements

For the three-month periods ended September 30, 2014 and 2013

(expressed in Canadian dollars)

### New accounting standards not yet adopted

#### IFRS 9, *Financial Instruments* ("IFRS 9")

In July 2014, the IASB issued the final standard on financial instruments on the classification and measurement, impairment and hedge accounting, to replace IAS 39 *Financial Instrument: Recognition and Measurement*. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. The Company is currently evaluating the impact of adopting this standard.

## 4 Investment in an associate

	As at September 30, 2014 \$	As at June 30, 2014 \$
Aurvista Gold Corporation, under the equity method (interest of 29.76%)		
Balance - Beginning of period	811,432	1,225,148
Share of net loss	-	(83,848)
Share of other comprehensive loss	-	(18,782)
Appreciation (impairment loss)	103,429	(311,086)
Balance - End of period	<u>914,861</u>	<u>811,432</u>

On August 9, 2011, following the closing of its initial public offering and its listing on the TSX Venture Exchange, Aurvista Gold Corporation («Aurvista»), a mining exploration company exercising its activities in the province of Quebec, acquired the Company's residual interest in the Douay, Douay Ouest, Douay Est and Block Joutel properties (collectively Douay), except for 10% in two claims of the Douay Ouest property for a consideration of 21,250,000 common shares of its share capital for a gross value of \$20,293,750 at the issuing date.

As a result of this transaction, the Company held 43.8% of the issued common shares of Aurvista. Since the Company has significant influence on Aurvista, the investment was accounted for under the equity method. On the transaction date, the investment in Aurvista was recorded based on the gross proceeds from the disposal of the Douay properties, being \$20,293,750, less a discount of \$4,533,750 related to share escrow agreements. The discount was calculated using a valuation model at an average rate of 22%, based on the release period of the escrowed shares. The Company will have to issue to the intermediaries involved in the transaction 564,200 Aurvista shares over an 18-month period in settlement of selling costs of \$538,812, less a discount of \$120,375. The amount to be paid will be adjusted based on the fair value of the shares held by the Company in Aurvista at the end of each period. Selling costs of \$42,748 were also paid to a law firm. Considering the escrow discount and the selling costs, the net proceeds amounted to \$13,925,664.

As at June 30, 2013, following the issuance of 20,976,012 shares by Aurvista and a distribution by the Company of 564,200 shares of Aurvista to intermediaries involved in the transaction, the Company holds 29.76% of the issued common shares of Aurvista. No issuance or distribution of the common shares of Aurvista took place during the current year.

# Société d'Exploration Minière Vior Inc.

## Notes to Financial Statements

For the three-month periods ended September 30, 2014 and 2013

(expressed in Canadian dollars)

As at September 30, 2014, the Company has determined that the fair value of its investment in Aurvista was exceeding its carrying amount and subsequently recognized an appreciation of \$103,429. This recovery value does not result in a carrying value of financial assets at amortized cost than would have been obtained at the time of recovery value of the depreciation of the asset, if the impairment had not been recognized. The investment was adjusted to its recoverable amount representing the quoted market price of the Aurvista shares as at September 30, 2014 less selling costs.

As at June 30, 2014, the Company has determined that the fair value of its investment in Aurvista was lower than its carrying amount and subsequently recognized an impairment loss of \$311,086. The investment was reduced to its recoverable amount representing the quoted market price of the Aurvista shares as at June 30, 2014 less selling costs.

The Company's share in the results of Aurvista as well as the financial information (assets, liabilities, revenues and net loss) of Aurvista will be accounted for and presented in the Company's financial statements with a maximum delay of one quarter depending of the availability of Aurvista's financial information at the time of the release of the Company's financial statements. The share in the results of Aurvista for the quarter ended June 30, 2014 is recorded in the preceding fiscal year of the Company.

Aurvista's financial information as at June 30, 2014

	\$		\$
Current assets	2,452,290	Revenues	-
Non-current assets	27,648,843	Net loss	(289,891)

## Notes to Financial Statements

For the three-month periods ended September 30, 2014 and 2013

(expressed in Canadian dollars)

### b) Fair value hierarchy

Financial instruments recorded at fair value on the statement of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following three levels:

Level 1 - valuation based on quoted prices observed in active markets for identical assets or liabilities.

Level 2 - valuation techniques based on inputs that are quoted prices of similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; inputs other than quoted prices used in a valuation model that are observable for that instrument; and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - valuation techniques with significant unobservable market inputs.

A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value.

As at September 30, 2014, the classification of the Company's financial instruments, recorded at fair value was as follows:

	As at September 30, 2014
	<u>Level 2</u>
	\$
<b>Financial assets</b>	
Shares	<u>60,625</u>

	As at June 30, 2014
	<u>Level 2</u>
	\$
<b>Financial assets</b>	
Shares	<u>57,063</u>

No transfer attributable to changes in the observability of market data was made among the fair value measurement hierarchy level during the three-month period ended September 30, 2014 and the year ended June 30, 2014.

### c) The valuation techniques that are used to measure fair value are as follows :

The fair value of shares is established using the bid price on the most beneficial active market for these instruments that is readily available to the Company. When a bid price is not available, the Company uses the closing price of the most recent transaction on such instrument. If the instrument is subject to a restriction on the sale period, the fair value is discounted and the instrument is classified in level 2.
