1 General information

Société d'Exploration Minière Vior Inc., (the "Company"), governed by the *Quebec Business Corporations Act*, is in the business of acquiring and exploring mining properties. It has not yet determined whether its properties contain ore reserves that are economically recoverable. The recoverability of the amounts shown for mining properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the exploration and development of its properties, and upon future profitable production or proceeds from the disposal of properties.

In addition to ongoing working capital requirements, the Company must secure sufficient funding for meeting its existing commitments for exploration and development programs and general and administration costs.

Management is periodically seeking additional forms of financing through the issuance of new equity instruments, the exercise of warrants and stock options to continue its operations, and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future. Without new funding being available, the Company may be unable to continue its operations, and amounts realized for assets may be less than amounts reflected in these financial statements.

The address of the Company's registered office is 116 St-Pierre, Suite 200, Quebec City, Quebec, Canada.

2 Basis of preparation

These condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of condensed interim financial statements, including IAS 34, *Interim Financial Reporting and using the same accounting policies* and methods of computation as our most recent annual financial statements. The condensed interim financial statements should be read in conjunction with the annual financial statements for the year ended June 30, 2012, which have been prepared in accordance with IFRS as issued by the IASB.

These condensed interim financial statements were approved by the Board of Directors for issue on May 29, 2013.

3 Critical accounting estimates and judgments

The preparation of financial statements in conformity with IFRS requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. These condensed interim financial statements include estimates that, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the financial statements, and may require accounting adjustments based on future occurrences.

In preparing these condensed interim financial statements, the significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the annual financial statements for the year ended June 30, 2012.

Estimates and assumptions are continually evaluated and are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Balance - End of period	3,293,728	4,350,000

On August 9, 2011, following the closing of its initial public offering and its listing on the TSX Venture Exchange, Aurvista Gold Corporation ("Aurvista") acquired the Company's residual interest in the Douay, Douay Ouest, Douay Est and Bloc Joutel properties (collectively Douay), except for 10% in two claims of the Douay Ouest for a consideration of 21,250,000 common shares of its share capital for a gross value of $20,293,750 at the issuing date.

As a result of this transaction, the Company holds 43.8% of the issued common shares of Aurvista. Since the Company has significant influence on Aurvista, the investment was accounted for under the equity method. On the transaction date, the investment in Aurvista was recorded based on the gross proceeds from the disposal of the Douay properties, being $20,293,750, less a discount of $4,533,750 related to share escrow agreements. The discount was calculated using a valuation model at an average rate of 22%, based on the release period of the escrowed shares. The Company will have to issue to the intermediaries involved in the transaction 564,200 Aurvista shares over an 18-month period in settlement of selling costs of $538,812, less a discount of $120,375. The amount to be paid will be adjusted based on the fair value of the shares held by the Company in Aurvista at the end of each period. Selling costs of $42,748 were also paid to a law firm. Considering the escrow discount and the selling costs, the net proceeds amounted to $13,925,664.

Following the issuance of 9,978,738 (6,549,000 in 2012) shares by Aurvista and a distribution by the Company of 281,100 (281,100 in 2012) shares of Aurvista to intermediaries involved in the transaction, the Company will hold 31.79% (38.06%) of the issued common shares of Aurvista. Accordingly, a gain on dillution of investment of $546,834 has been recognized in the statement of income.

As at March 31, 2013, the Company has determined that the fair value of its investment in Aurvista was lower than its carrying amount and subsequently recognized an impairment loss of $1,328,590. The investment was reduced to its recoverable amount representing the quoted market price of the Aurvista shares as at March 31, 2013 less selling costs.

Due to the non-availability of Aurvista’s financial information at the time of the release of the Company’s financial statements, the Company’s share in the results of Aurvista as well as the financial information (assets, liabilities, revenues and net loss) of Aurvista will be accounted for and presented in the Company’s next quarterly financial statements. The share in the results of Aurvista for the quarter ended December 31, 2012 is recorded in the current quarter of the Company.

(1) Do not include the flow-through share premium.

Cash and cash equivalents, other amounts receivable and accounts payable and accrued liabilities are financial instruments whose carrying value approximates their fair value due to their short-term maturity. An account payable in the form of shares is valued at the market value of the shares of the associate, which will be issued in payment of this debt of $56,505 included in accounts payable and accrued liabilities as at June 30, 2012.

The debt component of the convertible debentures is classified as financial liabilities at amortized cost. It is measured at fair value upon issuance and is then revalued at amortized cost using the effective interest method. The Company uses a 25% discount rate to calculate fair value of convertible debentures.
