## 1 General information

Société d'Exploration Minière Vior Inc. (the "Company") governed by the *Quebec Business Corporations Act*, is in the business of acquiring and exploring mining properties. It has not yet determined whether its properties contain ore reserves that are economically recoverable. The recoverability of the amounts shown for mining properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the exploration and development of its properties, and upon future profitable production or proceeds from the disposal of properties.

In addition to ongoing working capital requirements, the Company must secure sufficient funding to meet its existing commitments for exploration and development programs and general and administration costs.

Management is periodically seeking additional forms of financing through the issuance of new equity instruments, the exercise of warrants, common shares and stock options to continue its operations, and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future. Without new funding, the Company may be unable to continue its operations, and amounts realized for assets may be less than amounts reflected in these financial statements.

The address of the Company's registered office is 116 St-Pierre, Suite 200, Quebec City, Quebec, Canada.

## 2 Basis of preparation

These condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as defined in the Chartered Professional Accountants of Canada Handbook and adopted by the International Accounting Standards Board ("IASB") applicable to the preparation of condensed interim financial statements, including IAS 34, *Interim Financial Reporting* and using the same accounting policies and methods of computation as our most recent annual financial statements except for the change in accounting policy disclosed in Note 3. The condensed interim financial statements should be read in conjunction with the annual financial statements for the year ended June 30, 2016, which have been prepared in accordance with IFRS as issued by the IASB.

These financial statements were approved by the Board of Directors on November 17, 2016.

## 3 Changes in accounting policies

### New interpretation adopted during the year

The Company has adopted the following interpretation that has been applied in preparing these financial statements. These changes were made in accordance with the applicable transitional provisions.

IAS 1, *Presentation of financial statements* ("IAS 1")

In December 2014, the IASB issued amendments to IAS 1, *Presentation of financial statements*. These amendments clarify guidance on how to exercise professional judgment in determining the extent and structure of disclosures in financial statements. Since IAS 1 is a presentation standard, the amendments thereto, which are effective for annual periods beginning on or after January 1, 2016, have no impact on the Company's profit or loss or financial position.

### **New accounting standards not yet adopted**

The Company has not yet adopted certain standards, interpretations to existing standards and amendments which have been issued but have an effective date of later than September 30, 2016. Many of these updates are not relevant to the Company and are therefore not discussed herein.

#### *IFRS 9, Financial instruments ("IFRS 9")*

In July 2014, the IASB issued the final standard on financial instruments on the classification and measurement, impairment and hedge accounting, to replace IAS 39 *Financial instrument: recognition and measurement*. IFRS 9 is effective for annual periods beginning on or after January 1, 2018 and this standard should be adopted on a retrospective way. The Company is currently evaluating the impact of adopting this standard.

#### *IFRS 15, Revenue from contracts with customers ("IFRS 15")*

In May 2014, the IASB issued IFRS 15 *Revenue from contracts with customers*. The objective of this new standard is to provide a single, comprehensive revenue recognition model for all contracts with customers to improve comparability. This new standard contains principles that an entity will apply to determine the measurement of revenue and timing of when it is recognized. The underlying principle is that an entity will recognize revenue to depict the transfer of goods or services to customers at an amount that the entity expects to be entitled to in exchange for those goods or services. This new standard is effective for annual periods beginning on or after January 1, 2018. Early adoption is permitted. The Company is currently evaluating the impact of adopting this standard.

#### *IFRS 16, Lease ("IFRS 16")*

This new standard published by the IASB in January 2016, establishes principles for the recognition, measurement and presentation of the leases and the disclosures about them, points of view lessee and the lessor. For accounting of the customer, there will now only one model, which requires the recognition of all assets and liabilities arising from lease contracts. This standard is effective for annual periods beginning on or after January 1, 2019. The Company is currently evaluating the impact of adopting this standard.

## b) Fair value hierarchy

Financial instruments recorded at fair value on the statement of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following three levels:

Level 1 – valuation based on quoted prices observed in active markets for identical assets or liabilities.

Level 2 – valuation techniques based on inputs that are quoted prices of similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; inputs other than quoted prices used in a valuation model that are observable for that instrument; and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 – valuation techniques with significant unobservable market inputs.

A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value.

The following table presents the financial instruments recorded at fair value in the statement of financial position as at September 30, 2016 and as at June 30, 2016, classified using the fair value hierarchy described above:

	As at September 30,
	2016
	<u>Level 1</u>
<b>Financial assets</b>	\$
Shares	<u>4,033,731</u>
	As at June 30,
	2016
	<u>Level 1</u>
<b>Financial assets</b>	\$
Shares	<u>2,896,012</u>

No transfer attributable to changes in the observability of market data was made among the fair value measurement hierarchy level during the three-month period ended September 30, 2016 and the year ended June 30, 2016.

## c) Valuation techniques that are used to measure fair value

The fair value of shares is established using the bid price on the most beneficial active market for these instruments that is readily available to the Company. When a bid price is not available, the Company uses the closing price of the most recent transaction on such instrument. If the instrument is subject to a restriction on the sale period, the fair value is discounted and the instrument is classified in level 2.
